

Personal Protection Equipment (PPE)

Summit Ropes

CliC-iT-s

Summit Ropes believes that the use of high-end safety equipment should be an unconditional priority in any ropes course. Our facility uses **CLiC-iT®** continuous belay system to ensure a secure experience for all climbers. CLiC-iT® is a patented safety system with two communicating connectors. These connectors are automatically synchronized so that opening one connector automatically locks the other one, leaving one connector always locked on to the obstacle safety cable. Using CliC-iT-s prevents a climber from accidentally detaching both carabiners from the safety cable, providing both skilled and novice climbers proper protection when utilizing our course.

Singing Rock Harnesses

Here at Summit Ropes, we use **Singing Rock Full Body Harnesses**. Singing Rock is well known as one of the world leaders in the market of climbing equipment and professional protective equipment for work at height, military, and rescue. Our harnesses are easy to put on and adjust. All harnesses are thoroughly cleaned and safety checked

after each use.

Petzl Helmets

Helmets play an essential role as safety for vertical activities. Like most climbing sports, we require all participants to wear helmets. Our facility uses **Petzl** lightweight adjustable helmets because they exceed current standards by providing the best front, side, and rear protection. This added reinforcement guards the head against impacts from all directions. Although risk for head injury is minimal with Ropes Climbing, helmets are an essential part of Personal Protection Equipment (PPE) used to keep our guests safe.
